

# How to seek permission for orienteering events

July 2023

It is usually the responsibility of the Event Organisers to ensure we have the appropriate permission for our events. See the tables below for land owner/manager information for each map.

You can find the following documents on the [OT Organisers' Toolkit](#):

- Insurance Certificate of Currency
- Generic risk assessments for local events and OST events; adapt as necessary
- A template letter to landowner seeking access

If a site plan is required, usually a pdf copy of our map showing the location of the assembly area is sufficient.

If it is necessary to show where the map is, search for the map name on [Omaps](#).

## Private landholders

Contact details for private landholders, and some more complicated situations, is stored with the maps on our Map Store. The OT Mapping Officer will provide you with this information when they send you the map. If there are any changes please feed this back to the Mapping Officer so the information can be updated.

## Land managers

The following table summarises permission requirements for the following managers:

Tasmanian Parks and Wildlife Service (PWS)

City of Clarence Council (CCC)

Hobart City Council (HCC)

Kingborough Council (KC)

Glenorchy City Council (GCC)

Sustainable Timber Tasmania (STT)
